

## **Mr Erez Kreiner**

### **Short Curriculum Vitae (C.V.)**

Mr. Kreiner is the President of Five C, a global security solutions company providing cyber defense for governments, companies, and international organizations.

Prior to founding Five C, Mr. Kreiner served as the Director of Israel's National Cyber Security Authority for over five years. In this role, he was responsible for preventing cyber-attacks on Israel's critical infrastructures and assets and to secure classified information in government ministries, institution and companies. Over his twenty five years career at the ISA (Israel Security Agency), Mr. Kreiner has dealt with a range of risks in both the physical and virtual domains. He led the development of new methodologies and tools to defend information, communications, power supply, finance, health, and other essential services. Previously, he was the Director of Information Security at the ISA and the Director of Israeli Security in Europe.

During his career Mr. Kreiner collaborated and coordinated cyber defense activities with foreign governments, agencies, cyber organizations, and companies.

Mr Kreiner holds a B.S.C in Engineering from the Technion, Haifa, and a Master's in National Security.

### **Abstract of his Lecture**

Mr. kreiner is going to speak about topics from his experience in defending power chain from cyber threats.

The "power chain" goes for all the line of supply, from energy sources as gas and oil to electricity in sockets and other means of power.
